

## ***Refinery, Re-refinery, and Bio Fuel Catalysts***

LEXINGTON, Massachusetts (March 17, 2016) – WinterGreen Research announces that it has published a new study *Refinery, Re-refinery, and Bio Fuel Catalysts: Market Shares, Strategy, and Forecasts, Worldwide, 2016 to 2022*. The 2016 study has 36 pages, 18 tables and figures in excel. Worldwide Refinery, Re-refinery, and Bio Fuel Catalysts markets are poised to achieve significant growth with the shift in types of feedstock being processed.

Markets for the biofuel catalysts have the strongest growth throughout the forecast period, the environmental concerns worldwide will provide a thrust for these catalysts. The technology appears to be relatively mature. The feedstock is plentiful in some areas, and in these areas, refinement of biofuels makes economic sense.

Markets for re-refining catalysts will continue to grow in response to the maturing of the technology and the value gained from reusing motor oil. Crude oil refinery catalysts do not grow as rapidly as these other two segments because of the relatively mature market. Vendors seeks to customize the catalysts to give clients improved value related to the particular use pattern in a given locality.

According to Susan Eustis, lead author of the study, “Use of the new refinery catalyst represents a key milestone in provision of value to the refineries. Customized catalysts have provided an opportunity to transform the refinery business while keeping investment in infrastructure intact. New materials and new designs are bringing that transformation forward. By furthering innovation, continued growth is assured.”

The worldwide market for refinery, refinery, and biofuel catalysts products is \$4.6 billion anticipated to reach \$8.3 billion by 2022. The complete report provides a comprehensive analysis. The reports cover markets for Refinery, Re-refinery, and Bio Fuel Catalysts.

WinterGreen Research is an independent research organization funded by the sale of market research studies all over the world and by the implementation of ROI models that are used to calculate the total cost of ownership of equipment, services, and software. The company has 35 distributors worldwide, including Global Information Info Shop, Market Research.com, Research and Markets, and Thompson Financial. It conducts its business with integrity.

The increasingly global nature of science, technology and engineering is a reflection of the implementation of the globally integrated enterprise. Customers trust wintergreen research to work alongside them to ensure the success of the participation in a particular market segment.

WinterGreen Research supports various market segment programs; provides trusted technical services to the marketing departments. It carries out accurate market share and forecast analysis services for a range of commercial and government customers globally. These are all vital market research support solutions requiring trust and integrity.
