

Computer Assisted Coding: Market Shares, Strategies, and Forecasts, Worldwide, 2016-2022

Table of Contents

Computer Assisted Coding software is evolving platforms that are useful for hospitals, clinical facilities, and physician office groups seeking to achieve excellence and repeatability in billing and workflow management.

Computer Assisted Coding: Executive Summary

The study is designed to give a comprehensive overview of the Computer Assisted Coding software market segment. Research represents a selection from the mountains of data available of the most relevant and cogent market materials, with selections made by the most senior analysts. Commentary on every aspect of the market from independent analysts creates an independent perspective in the evaluation of the market. In this manner the study presents a comprehensive overview of what is going on in this market, assisting managers with designing market strategies likely to succeed.

1. Computer Assisted Coding Market Description and Market Dynamics	34
1.1 Coding Challenge	34
1.1.1 Computer Assisted Coding (CAC)	34
1.1.2 Advances In Natural Language Processing And Informatics	36
1.1.3 Using Electronic Health Record (EHR) Documentation To Generate Codes	37
1.2 Computer-Assisted Coding	38
1.2.1 Physician Practice Industry Forces Affecting Development of CAC	39
1.2.2 Application of CAC Technology	41
1.3 Development of a CAC Tool For Hospital Inpatient Use	42
1.3.1 CAC Impact on the Coding Workflow	42
1.3.2 Computers Replace Human Coders	42
1.3.3 CAC Applied Without Human Intervention Depends On Critical Differences Between CAC Systems	43
1.4 Healthcare Industry Largest In United States	44
1.4.1 Building a Safer Health System	46
1.4.2 Facilitating the Use of Technology in the Healthcare Industry	47
1.4.3 Prescription Drug Modernization	48
1.5 Medical Necessity and Medical Necessity Errors	49
1.6 Physician Office Electronic Coding	50
1.6.1 CAC Automates and Accelerates Auditing	54
1.7 Natural Language Solutions	54
1.7.1 State Of Language Technology Evaluation	55
1.8 Computerized Workflow System	57
1.8.1 Confidence Assessment Module	58
1.8.2 Researching Electronic Coding Products:	60
