**Personal Electric Vehicle EV Cars: Technology Evolves To Provide Better Batteries**

**Personal Electric Vehicle EV Cars: Market Shares, Strategies, and Forecasts, Worldwide, 2019-2025**

LEXINGTON, Massachusetts (March 17, 2019) – WinterGreen Research announces that it has published a new study Personal Electric Vehicle EV Cars: Market Shares, Strategy, and Forecasts, Worldwide, 2018 to 2025. The 2019 study has 210 pages, 110 tables and figures. The vendors in the Personal Electric Vehicle EV Cars industry have invested in high-quality technology and processes to develop leading edge electric vehicle capability a being implemented quickly so as to benefit from first mover advantage in the market.

Personal Electric Vehicle EV Car manufacture promises to replace gasoline engine cars by 2025. Electric cars leverage new battery technology to achieve better cost benefit ratios. Electric vehicles provide a positive ROI to owners because the cost of recharging batteries is significantly less than the cost of gasoline for similar mileage driven.

## **WinterGreen Research, INC.**

**Electric car markets bring lower costs and higher value when battery technology is modernized. As lithium ion battery cathodes undergo rapid improvement, the lower cost batteries make electric vehicles less expensive than gas powered vehicles. Electric cars cost less than ICE engine cars, finally. Electric cars do require battery replacement after 5 years.**

**Global warming has become a serious issue. Consumers have become aware of the need to embrace renewable energy programs directly. The UK is in danger of completely running out of fresh water in 10 years. The high school students are protesting global warming every Friday - worldwide. Nebraska farmers and Iowa voters are fearful about global warming. Consumers are beginning to demand electric vehicles. Personal Electric Vehicle EV Cars that depend on efficient lithium ion batteries have finally begun to tow the mark with regard to addressing global warming.**

**Electric cars leverage new battery technology to achieve better cost benefit ratios. Electric car markets bring lower costs and higher value when battery technology is modernized. As lithium ion battery cathodes undergo rapid improvement, the lower cost batteries make electric vehicles less expensive than gas powered vehicles. Electric vehicles provide a positive ROI to owners because recharging batteries is significantly less than the cost of gasoline for similar mileage driven. Electric cars cost less than ICE engine cars, finally. Electric cars do require battery replacement after 5 years.**

**Over the last several years, electric vehicles have entered the mainstream, and the market segment is expected to grow creating radical changes in personal transport. How the segment unfolds is still to be decided, but all signs point to a situation creating 36% of the cars on the road are electric by 2025. By that time, all of the cars manufactured will be electric. Automakers and suppliers are dramatically expanding electrified offerings to achieve gains in fuel efficiency, reductions in emissions, and modernization of the model offerings.**

**As market participants to establish positions in the electric personal vehicle offerings. the leadership positions are shifting. With the advent of Tesla selling cars over the internet, even the distribution channels threaten to shift dramatically. Industry leadership by Tesla has been achieved by making significant investment in manufacturing and battery infrastructure to facilitate the shift to a next generation of automotive transport.**

**Automotive manufacturers and suppliers are making a concerted shift away from the internal combustion engine to fully electric vehicles. To retain profitability, companies are improving the efficiency of electric vehicles. The vendors are working to reduce the cost of core components, particularly the traction motors and power electronics.**

**Vehicles require electric drive motors, generators, and power electronics for alternating current-direct current (AC-DC) conversion as well as DC voltage conversion to support multiple vehicle subsystems.**

**The global electric vehicle market at \$39.8 billion in 2018 is projected to reach \$1.5 trillion by 2025. Units sales are anticipated to reach 97 million vehicles worldwide by 2025. EV sales worldwide at 2.7 million vehicles in 2018 will go to 11 million in 2020.**

# WinterGreen Research, INC.

Wintergreen Research forecasts the availability of 400 electric vehicle models by 2025. The EV industry needs to overcome major challenges related to battery technology and charging infrastructure, to sustain the growth of EVs.

WinterGreen Research is an independent research organization funded by the sale of market research studies all over the world and by the implementation of ROI models that are used to calculate the total cost of ownership of equipment, services, and software. The company has 35 distributors worldwide, including Global Information Info Shop, Market Research.com, Research and Markets, electronics.ca, and Thompson Financial. WinterGreen Research is positioned to help customers facing challenges that define the modern enterprises.

The increasingly global nature of science, technology and engineering is a reflection of the implementation of the globally integrated enterprise. Customers trust wintergreen research to work alongside them to ensure the success of the participation in a particular market segment.

WinterGreen Research supports various market segment programs; provides trusted technical services to the marketing departments. It carries out accurate market share and forecast analysis services for a range of commercial and government customers globally. These are all vital market research support solutions requiring trust and integrity.

Key Words: Personal Electric Vehicle EV Cars, New 811 battery technology, EV Battery Improvement, Electric Vehicle Car Segment, Market Forecasts, Small Electric Vehicle Car, Mid-Size Electric Vehicle Car, Luxury Electric Vehicle Car, TaaS Shipments, Electric Cars Market Driving Forces, Motor Controller, Electric Engine, Other Components of an Electric Engine, EV Economies of Scale, Chinese EV Market, US EV Market, European EV Market, German EV Market, UK EV Market, Japanese EV Market, Regional EV Markets, Renewable energy generation, ,

### Personal Electric Vehicle EV Cars: Market Shares, Strategies, and Forecasts, Worldwide, 2019 to 2025

#### Report Methodology

This is the 817th report in a series of primary market research reports that provide forecasts in communications, telecommunications, the Internet, computer, software, telephone equipment, health equipment, and energy. Automated process and significant growth potential are priorities in topic selection. The project leaders take direct responsibility for writing and preparing each report. They have significant experience preparing industry studies. Forecasts are based on primary research and proprietary data bases.

The primary research is conducted by talking to customers, distributors and companies. The survey data is not enough to make accurate assessment of market size, so WinterGreen Research looks at the value of shipments and the average price to achieve market assessments. Our track record in achieving accuracy is unsurpassed in the industry. We are known for being able to develop accurate market shares and projections. This is our specialty.

The analyst process is concentrated on getting good market numbers. This process involves looking at the markets from several different perspectives, including vendor shipments. The interview process is an essential aspect as well. We do have a lot of granular analysis of the different shipments by vendor in the study and addenda prepared after the study was published if that is appropriate.

Forecasts reflect analysis of the market trends in the segment and related segments. Unit and dollar shipments are analyzed through consideration of dollar volume of each market participant in the segment. Installed base analysis and unit analysis is based on interviews and an information search. Market share analysis includes conversations with key customers of products, industry segment leaders, marketing

directors, distributors, leading market participants, opinion leaders, and companies seeking to develop measurable market share.

Over 200 in depth interviews are conducted for each report with a broad range of key participants and industry leaders in the market segment. We establish accurate market forecasts based on economic and market conditions as a base. Use input/output ratios, flow charts, and other economic methods to quantify data. Use in-house analysts who meet stringent quality standards.

Interviewing key industry participants, experts and end-users is a central part of the study. Our research includes access to large proprietary databases. Literature search includes analysis of trade publications, government reports, and corporate literature.

Findings and conclusions of this report are based on information gathered from industry sources, including manufacturers, distributors, partners, opinion leaders, and users. Interview data was combined with information gathered through an extensive review of internet and printed sources such as trade publications, trade associations, company literature, and online databases. The projections contained in this report are checked from top down and bottom up analysis to be sure there is congruence from that perspective.

The base year for analysis and projection is 2018. With reference to data from back to 2010 and for the several years prior to the 2018 baseline, market projections were developed for 2019 through 2025. These projections are based on a combination of a consensus among the opinion leader contacts interviewed combined with understanding of the key market drivers and their impact from a historical and analytical perspective.

The analytical methodologies used to generate the market estimates are based on penetration analyses, similar market analyses, and delta calculations to supplement independent and dependent variable analysis. All analyses are displaying selected descriptions of products and services.

This research includes reference to an ROI model that is part of a series that provides IT systems financial planners access to information that supports analysis of all the numbers that impact management of a product launch or large and complex data center. The methodology used in the models relates to having a sophisticated analytical technique for understanding the impact of workload on processor consumption and cost.

WinterGreen Research has looked at the metrics and independent research to develop assumptions that reflect the actual anticipated usage and cost of systems. Comparative analyses reflect the input of these values into models.

The variables and assumptions provided in the market research study and the ROI models are based on extensive experience in providing research to large enterprise organizations and data centers. The ROI models have lists of servers from different manufacturers, Systems z models from IBM, and labor costs by category around the world. This information has been developed from WinterGreen research proprietary data bases constructed as a result of preparing market research studies that address the software, energy, healthcare, telecommunications, and hardware businesses.

## YOU MUST HAVE THIS STUDY

### Personal Electric Vehicle EV Cars: Market Shares, Strategies, and Forecasts, Worldwide, 2019-2025

#### Table of Contents

##### Personal Electric Vehicle EV Cars: Executive Summary

The study is designed to give a comprehensive overview of the Personal Electric Vehicle EV Cars market segment. Research represents a selection from the mountains of data available of the most relevant and cogent market materials, with selections made by the most senior analysts. Commentary on every aspect of the market from independent analysts creates an independent perspective in the evaluation of the market. In this manner the study presents a comprehensive overview of what is going on in this market, assisting managers with designing market strategies likely to succeed.

## ABOUT THE COMPANY

**WinterGreen Research**, research strategy relates to identifying market trends through reading and interviewing opinion leaders. By using analysis of published materials, interview material, private research, detailed research, social network materials, blogs, and electronic analytics, the market size, shares, and trends are identified. Analysis of the published materials and interviews permits WinterGreen Research senior analysts to learn a lot more about markets. Discovering, tracking, and thinking about market trends is a high priority at WinterGreen Research. As with all research, the value proposition for competitive analysis comes from intellectual input.

**WinterGreen Research**, founded in 1985, provides strategic market assessments in telecommunications, communications equipment, health care, Software, Internet, Energy Generation, Energy Storage, Renewable energy, and advanced computer technology.

Industry reports focus on opportunities that expand existing markets or develop major new markets. The reports access new product and service positioning strategies, new and evolving technologies, and technological impact on products, services, and markets. Innovation that drives markets is explored. Market shares are provided. Leading market participants are profiled, and their marketing strategies, acquisitions, and strategic alliances are discussed. The principals of WinterGreen Research have been involved in analysis and forecasting of international business opportunities in telecommunications and advanced computer technology markets for over 30 years.

The studies provide primary analytical insight about the market participants. By publishing material relevant to the positioning of each company, readers can look at the basis for analysis. By providing descriptions of each major participant in the market, the reader is not dependent on analyst assumptions, the information backing the assumptions is provided, permitting readers to examine the basis for the conclusions.

WinterGreen Research is positioned to help customers facing challenges that define the modern enterprises. The increasingly global nature of science, technology and engineering is a reflection of the implementation of the globally integrated enterprise. Customers trust wintergreen research to work alongside them to ensure the success of the participation in a particular market segment.

WinterGreen Research supports various market segment programs; provides trusted technical services to the marketing departments. It carries out accurate market share and forecast analysis services for a range of commercial and government customers globally. These are all vital market research support solutions requiring trust and integrity.

## About The Principal Authors

**Susan Eustis**, President, co-founder of WinterGreen Research, is a senior analyst. She has done research in communications, healthcare equipment, and computer markets and applications. She holds several patents in microcomputing and parallel processing. She has the original patents in electronic voting machines. She has new patent applications in format varying, mulitprocessing, electronic voting, and oxygen management. She is the author of recent studies of the drone and robot marketing strategies, Internet equipment, biometrics, biomaterials, a study of Internet Equipment, Artificial Intelligence, IoT, Worldwide Telecommunications Equipment, Top Ten Telecommunications, Digital Loop Carrier, Web Hosting, Web Services, and Application Integration markets. Ms. Eustis is a graduate of Barnard College. Ms. Eustis was named Top Woman CEO in 2012 by Who's Who Worldwide. She was named Top Woman Market Research Analyst in 2012, 2013,2014,2015, 2016, 2017, and 2018. She has been twice featured on the cover of the Women of Distinction magazine. She was cited in a recent Time Magazine article and major media articles on Youth Sports market growth. She was also featured in recent Wall Street Journal, New York Times, Barron's, Bloomberg, HBO, and London Times articles.

**About the WinterGreen Research Team:** The WinterGreen Research Team is comprised of senior analysts that prepare the market research and analysis that is offered to the client and developed using an iterative process to achieve a final study. Typical projects include providing market/viability research. The team can look at how drones can be applied to critical infrastructures safety, including: type of market existing, Barriers, Forecast demand and competitors, SWOT and competitive advantages, Price Analysis, product design recommendations (marketing orientation).

Research is typically for many different regions or localities, for example EU countries including Spain, UK, Nordic, Germany, and France. Typical projects profile the United States and areas of Asia. It is common to three representative countries from South America, Brazil, Argentina, Chile, and Mexico. Representative countries from Asia APAC typically include Japan, China, India, and Australia.

Critical infrastructure safety, including: type of market existing, barriers to entry and to faithful execution of product provision, forecast of demand, market share, SWOT, competitive advantage of major competitors, identification of new technologies and new companies, price performance analysis, product design recommendations, and marketing considerations are typical topics covered.
