Analysis to Provide Unique Perspective of Market Sector Revenue

The WinterGreen Impact product is an Excel document that provides ten years of quarterly revenue for the top ten to twenty companies in a market segment. This granular numerical analysis is supported by descriptions of the strengths and weakness of each company. Analysis of the market segments and market driving forces are included.

Company write-ups provide illumination into the strengths and challenges that each company faces in the market segment in a competitive context that is rarely, if ever available. Company write-ups provide details which elucidate the opportunities created by the particular product set of each company, and identify potential acquisition targets. Quarterly updates provide information on the changing nature of the market, companies of particular note, and overall market strength. Both public and private companies are included to allow direct comparison of each company to its direct competitors. This is not using comps that are so typical in the market, but is actually comparing the large companies to the smaller private companies in the same market to allow actual direct comparison.

The numerical analysis presented leads to understanding of the market trends. By presenting actual revenue numbers, further analysis can be performed to gain additional market insight. An index of the growth (or loss) of each company's revenue since 2006 is also included. The graph of the index gives a visual grouping of the performance of the companies in the market segment. This highlights the companies that have had strong or weak growth over a particular period. Strong growth and market share dominance are not necessarily synonymous. When they are, this indicates a truly strong company. Thus, the WinterGreen Impact product provides in-depth perspective, and identification of the winners and losers in this market segment.

WinterGreen *Impact* Scooters Medical Equipment Markets: Market Share Analysis

Ageing Population Drives Growth of Worldwide Homecare Equipment

Homecare Medical Equipment Markets are poised to achieve continuing growth as the aging population needs homecare treatment. The homecare equipment market consists primarily of wheelchairs, scooters, oxygen treatment equipment, accessibility beds, lifts, and toilets. Homecare medical equipment has until recently been sold primarily through distributors. The impact of direct sales through the Internet has brought about some distribution market consolidation, leading to a decrease of in the number of distributors for homecare equipment.

As the population ages, people are more frail and need assistance for mobility. Wheelchair technology is evolving to give people with disabilities more mobility. Mobility depends on a wheelchair that is fit to purpose. Power and manual wheelchairs are bought depending on the needs of the customers. Medical scooters are a growing segment of mobility for the aging population, as they perform better in an outdoor environment. Many issues impact the choice of a wheelchair, including cost and reimbursement availability.

WinterGreen Research is an independent research organization funded by the sale of market research studies all over the world and by the implementation of ROI models that are used to calculate the total cost of ownership of equipment, services, and software. The company has 35 distributors worldwide, including Global Information Info Shop, Market Research.com, Research and Markets, electronics.ca, and Thompson Financial. WinterGreen Research is positioned to help customers facing challenges that define the modern enterprises. The increasingly global nature of science, technology and engineering is a reflection of the implementation of the globally integrated enterprise. Customers trust wintergreen research to work alongside them to ensure the success of the participation in a particular market segment.

WinterGreen Research supports various market segment programs; provides trusted technical services to the marketing departments. It carries out accurate market share and forecast analysis services for a range of commercial and government customers globally. These are all vital market research support solutions requiring trust and integrity.

WinterGreen *Impact* Scooters Medical Equipment Markets Market Share Analysis: 2006-Current

Report Methodology

WinterGreen Impact Market Share Trends product is created using a methodology which includes conducting interviews, mining published data, tracking industry trends, and expert analysis. The combination of the different sources of information allow a unique look at each company's quarterly performance inside a given market segment. This analysis provides a view of the total market segment, where direct comparison between large and small companies is facilitated.

Interviews are conducted with vendors, former employees, distributors, users, and industry experts who inform senior staff of ongoing trends and events. Sufficient interviews are performed to insure understanding of the selected market segment.

WinterGreen Research, Inc.

Published data sources included in market segment analysis are social media comments, blogs, SEC filings, and Internet searches.

WinterGreen Research has a 30 year proven track record of accurately forecasting markets. Now this experience and proprietary data is being used to break out each company's revenues inside a given market sector. The expertise in tracking technology trends is what has allowed accurate forecasting of many diverse markets.

YOU MUST HAVE THIS ANALYSIS

WinterGreen Impact Scooters Medical Equipment Markets Market Share Analysis 2006-Current

The analysis provides vendor strengths and weakness descriptions, market forecasts, and numerical market revenue for market participants. The unit shipment analysis, the price point, scooter size analysis, and regional market sizes are also provided.

ABOUT THE COMPANY

WinterGreen Research, founded in 1985, provides strategic market assessments in telecommunications, communications equipment, health care, software, internet, energy generation, energy storage, renewable energy, and advanced computer technology.

Industry reports focus on opportunities that expand existing markets or develop major new markets. The reports access new product and service positioning strategies, new and evolving technologies, and technological impact on products, services, and markets. Innovation that drives markets is explored. Market shares are provided. Leading market participants are profiled, and their marketing strategies, acquisitions, and strategic alliances are discussed. The principals of WinterGreen Research have been involved in analysis and forecasting of international business opportunities in telecommunications and advanced computer technology markets for over 30 years.
