

***Youth Sports Video Equipment: -- Markets Reach \$5.5 Billion By 2024***

LEXINGTON, Massachusetts (February 5, 2019) – WinterGreen Research announces that it has published a new study Youth Sports Video Equipment: Market Shares, Strategy, and Forecasts, Worldwide, 2019 to 2024. The 2019 study has 225 pages, 115 tables and figures. Worldwide markets are poised to achieve significant growth as law enforcement and companies test for substance abuse.

Youth sports teams are being created that leverage video to provide a quality experience for the youthful participants, coaches, and parents. Demand for more video for youth teams comes from a change in the way youth sports is delivered. Children love teams if they have friends and if they can perform at a level that is satisfying and that builds self-esteem. Video helps with that. Youth sports change is moving teams in the direction of using video to create an enjoyable fulfilling experience for a child.

Youth sports teams have a branded approach to reaching their audience. All kids want to play for elite teams, branding and winning create appeal for teams. Kids want to have fun so much of the branding emphasizes fun over winning, winning is just a by-product of having fun, even at the professional level.

Consideration of Youth Sports Video Equipment Market Forecasts indicates that markets at \$2.1 billion will reach \$5.5 billion by 2024. Growth comes as youth sports teams use video for coaching and for streaming games to people located remotely.

WinterGreen Research is an independent research organization funded by the sale of market research studies all over the world and by the implementation of ROI models that are used to calculate the total cost of ownership of equipment, services, and software.
