

Collaborative Robots – Markets Reach \$13.3 Billion by 2026

LEXINGTON, Massachusetts (March 12, 2020) – WinterGreen Research announces that it has a new study on Collaborative Robots Next Generation Human / Robot Interaction Devices, Market Shares, Market Forecasts, Market Analysis, 2020-2026. The 2020 study has 154 pages, 87 tables and figures. Collaborative Robots represent next generation new industrial revolution technology, creating a market that is \$13.3 billion dollars in 2020.

Collaborative robot markets are driven primarily by robotic adoption in the automotive, metal and machining, furniture and equipment, food and beverage, and plastic and polymers industries.

Working hand-in-hand with humans, collaborative robots precisely perform complex, dull, and cumbersome tasks at faster rates. This is in contrast of industrial robots that do not generally interact with humans. Significant returns on investments are achieved by adopting collaborative robots. Deploying collaborative robots in manufacturing must be done to survive in an increasingly competitive market that is quickly moving toward a new industrial revolution.

WinterGreen Research is an independent research organization funded by the sale of market research studies all over the world and by identifying next generation technology. It is next generation technology that drives market growth. The company has 35 distributors worldwide, including Global Information Info Shop, Market Research.com, Research and Markets, Report Linker, and Electronics.CA,.

WinterGreen Research is positioned to help customers facing challenges that define the modern enterprises. The increasingly global nature of science, technology and engineering is a reflection of the implementation of the globally integrated enterprise. Customers trust wintergreen research to work alongside them to ensure the success of the participation in a particular market segment.

WinterGreen Research supports various market segment programs; provides trusted technical services to the marketing departments. It carries out accurate market share and forecast analysis services for a range of commercial and government customers globally. These are all vital market research support solutions requiring trust and integrity.
