

## ***Stationary Oxygen Concentrators -- Markets Reach \$1.7 Billion By 2026***

LEXINGTON, Massachusetts (April 29, 2019) – WinterGreen Research announces that it has published a new study Stationary Oxygen Concentrators: Market Shares, Strategy, and Forecasts, Worldwide, 2019 to 2026. The 2019 study has 162 pages, 47 tables and figures. Worldwide Stationary Oxygen Concentrators markets are expected to achieve significant growth as the pandemic emergency emerges as a worldwide issue. Some Stationary Oxygen Concentrators manufacturers have greater market power in specific markets, those with good online marketing reach. Philips Respironics has been able to build enormous credibility in the market. Vendors have seen a significant increase in demand in these specific markets during the pandemic, helping in the sale of Stationary Oxygen Concentrators.

The Sars-2 coronavirus is really a bad thing. Significant death rates have been recorded. Stationary Oxygen Concentrators are a front line of defense and supplemental oxygen at home will be for a long time. Every health agency worldwide is urging more use of them. This trend is expected to continue for a long time, even after vaccines are available to containing the spread.

Testing and Covid-19 are part of the ways being used to manage the disease. Stationary Oxygen Concentrators are needed to address the respiratory difficulties brought by Covid-19. Stationary Oxygen Concentrators are but one aspect of the ways that Board's of Health have to approach the pandemic, but an essential aspect.

Testing is needed to know whether or not a person has coronavirus.

Testing is needed to know whether any person around an infected person has a coronavirus.

To stop Covid-19 extensive testing is needed, in combination with use of Stationary Oxygen Concentrators, hand sanitizer, continued shelter in place, and selected quarantine response.

According to Susan Eustis, lead author of the team that prepared the study, “Growing acceptance of of Stationary Oxygen Concentrators is a new reality in the pandemic era. These products provide basic respiratory protections going forward.”

The worldwide market for Stationary Oxygen Concentrators at \$866 million in 2019 is expected to spike to \$1.4 billion in 2020, growing to \$1.7 billion by 2026. The unmistakable impact of disease in increasing the death rates worldwide is driving people to take the advantage of home oxygen relief in the context of virtual care delivery. The complete report provides a comprehensive analysis of Stationary Oxygen Concentrators in different categories, illustrating the diversity of uses for Stationary Oxygen Concentrators in the era of a pandemic. A complete analysis is done, looking at the growing need for hand sanitizing everywhere.

WinterGreen Research is an independent research organization funded by the sale of market research studies all over the world and by the implementation of ROI models that are used to calculate the total cost of ownership of equipment, services, and software. The company has 35 distributors worldwide, including Global Information Info Shop, Market Research.com, Research and Markets, electronics.ca, and Thompson Financial. It conducts its business with integrity.

The increasingly global nature of science, technology and engineering is a reflection of the implementation of the globally integrated enterprise. Customers trust wintergreen research to work alongside them to ensure the success of the participation in a particular market segment.

WinterGreen Research supports various market segment programs; provides trusted technical services to the marketing departments. It carries out accurate market share and forecast analysis services for a range of commercial and government customers globally. These are all vital market research support solutions requiring trust and integrity.
