**Mid-IR Sensors: Technology Evolves**

**Mid-IR Sensors: Market Shares, Strategies, and Forecasts, Worldwide, 2019-2025**

**LEXINGTON, Massachusetts (April 12, 2019) – WinterGreen Research announces that it has published a new study Mid-IR Sensors: Market Shares, Strategy, and Forecasts, Worldwide, 2019 to 2025. The 2019 study has 498 pages, 215 tables and figures. The vendors in the Mid-IR Sensors industry have invested in high-quality technology and processes to develop leading edge Internet of Things capability. Sensors are being implemented in a wide variety of applications by each vendor so as to permit benefit from first mover advantage in the market.**

**Mid-wave infrared (mid-IR) is the spectral region where most of the fundamental structural information is produced. Measurements in that region can provide useful information from outside the visual spectrum. Mid-IR sensors bring the ability to sense temperature, distance, presence, motion and texture. This extension of the human senses, in combination with digital systems promises a revolution in improved control of everything people use and touch.**

**Mid IR sensors are the base of the Internet of Things initiatives, they form the building blocks for all different types of imaging and controls. Drones, robots, industrial robots, machines, cameras, buildings, fire departments, traffic lights, traffic control, the military, the border patrol, law enforcement, healthcare, asthma treatment, virtually everyone will increasingly use mid IR sensors.**

**Mid-IR sensor manufacture promises to change everything. More visibility, more awareness permits greater and more granular control of action in the military. In industry, more process can be automated. It supports more independent and safer cars. It permits electric cars to replace gasoline engine cars by 2025. Mid-IR Sensors leverage new technology to achieve better cost benefit ratios. Laboratory bench measuring systems can be miniaturized and move to the field.**

**The worldwide mid-IR sensor market at \$9.7 billion in 2018 is projected to reach \$109.9 billion by 2025. Units sales at 611 million sensors in 2018 are anticipated to reach 10.7 billion sensors worldwide by 2025. Mid-IR sensors impact every industry, driving significant change. For example, Wintergreen Research forecasts the availability of 400 electric vehicle models by 2025. The EV industry is growing in response to automobile vendors responding to market demand for vehicles that do not hurt the environment. .**

**WinterGreen Research is an independent research organization funded by the sale of market research studies all over the world and by the implementation of ROI models that are used to calculate the total cost of ownership of equipment, services, and software. The company has 35 distributors worldwide, including Global Information Info Shop, Market Research.com, Research and Markets, electronics.ca, and Thompson Financial. WinterGreen Research is positioned to help customers facing challenges that define the modern enterprises.**

# WinterGreen Research, INC.

**The increasingly global nature of science, technology and engineering is a reflection of the implementation of the globally integrated enterprise. Customers trust wintergreen research to work alongside them to ensure the success of the participation in a particular market segment.**

**WinterGreen Research supports various market segment programs; provides trusted technical services to the marketing departments. It carries out accurate market share and forecast analysis services for a range of commercial and government customers globally. These are all vital market research support solutions requiring trust and integrity.**

**Mid-IR Sensors: Market Shares, Strategies, and Forecasts,  
Worldwide, 2019 to 2025**

**Report Methodology**

This is the 818th report in a series of primary market research reports that provide forecasts in communications, telecommunications, the Internet, computer, software, telephone equipment, health equipment, and energy. Automated process and significant growth potential are priorities in topic selection. The project leaders take direct responsibility for writing and preparing each report. They have significant experience preparing industry studies. Forecasts are based on primary research and proprietary data bases.

The primary research is conducted by talking to customers, distributors and companies. The survey data is not enough to make accurate assessment of market size, so WinterGreen Research looks at the value of shipments and the average price to achieve market assessments. Our track record in achieving accuracy is unsurpassed in the industry. We are known for being able to develop accurate market shares and projections. This is our specialty.

The analyst process is concentrated on getting good market numbers. This process involves looking at the markets from several different perspectives, including vendor shipments. The interview process is an essential aspect as well. We do have a lot of granular analysis of the different shipments by vendor in the study and addenda prepared after the study was published if that is appropriate.

Forecasts reflect analysis of the market trends in the segment and related segments. Unit and dollar shipments are analyzed through consideration of dollar volume of each market participant in the segment. Installed base analysis and unit analysis is based on interviews and an information search. Market share analysis includes conversations with key customers of products, industry segment leaders, marketing directors, distributors, leading market participants, opinion leaders, and companies seeking to develop measurable market share.

Over 200 in depth interviews are conducted for each report with a broad range of key participants and industry leaders in the market segment. We establish accurate market forecasts based on economic and market conditions as a base. Use input/output ratios, flow charts, and other economic methods to quantify data. Use in-house analysts who meet stringent quality standards.

## WinterGreen Research, INC.

Interviewing key industry participants, experts and end-users is a central part of the study. Our research includes access to large proprietary databases. Literature search includes analysis of trade publications, government reports, and corporate literature.

Findings and conclusions of this report are based on information gathered from industry sources, including manufacturers, distributors, partners, opinion leaders, and users. Interview data was combined with information gathered through an extensive review of internet and printed sources such as trade publications, trade associations, company literature, and online databases. The projections contained in this report are checked from top down and bottom up analysis to be sure there is congruence from that perspective.

The base year for analysis and projection is 2018. With reference to data from back to 2010 and for the several years prior to the 2018 baseline, market projections were developed for 2019 through 2025. These projections are based on a combination of a consensus among the opinion leader contacts interviewed combined with understanding of the key market drivers and their impact from a historical and analytical perspective.

The analytical methodologies used to generate the market estimates are based on penetration analyses, similar market analyses, and delta calculations to supplement independent and dependent variable analysis. All analyses are displaying selected descriptions of products and services.

This research includes reference to an ROI model that is part of a series that provides IT systems financial planners access to information that supports analysis of all the numbers that impact management of a product launch or large and complex data center. The methodology used in the models relates to having a sophisticated analytical technique for understanding the impact of workload on processor consumption and cost.

WinterGreen Research has looked at the metrics and independent research to develop assumptions that reflect the actual anticipated usage and cost of systems. Comparative analyses reflect the input of these values into models.

The variables and assumptions provided in the market research study and the ROI models are based on extensive experience in providing research to large enterprise organizations and data centers. The ROI models have lists of servers from different manufacturers, Systems z models from IBM, and labor costs by category around the world. This information has been developed from WinterGreen research proprietary data bases constructed as a result of preparing market research studies that address the software, energy, healthcare, telecommunications, and hardware businesses.

## YOU MUST HAVE THIS STUDY

### Mid-IR Sensors: Market Shares, Strategies, and Forecasts, Worldwide,

2019-2025

## Table of Contents

### Mid-IR Sensors: Executive Summary

The study is designed to give a comprehensive overview of the Mid-IR Sensors market segment. Research represents a selection from the mountains of data available of the most relevant and cogent market materials, with selections made by the most senior analysts. Commentary on every aspect of the market from independent analysts creates an independent perspective in the evaluation of the market. In this manner the study presents a comprehensive overview of what is going on in this market, assisting managers with designing market strategies likely to succeed.

## Table of Contents

<b>MID IR SENSORS EXECUTIVE SUMMARY</b>	<b>31</b>
Mid-Infrared (IR) Sensor Systems	31
Benefits of Mid IR Sensors	32
Mid IR Sensor Market Driving Forces	33
Mid IR Sensor Market Shares	35
Mid IR Sensor Market Forecasts	38
<b>1. MID IR SENSOR MARKET DESCRIPTION AND MARKET DYNAMICS</b>	<b>40</b>
1.1 Mid IR Sensors Offer Wavelength Tunability and High Optical Power	40
1.1.1 Military Funded Development of Mid-IR Sensors	42
1.1.2 Distributed Feedback Grating	43
1.2 Products with Mid-IR Sensors	44
1.3 Mid-IR Sensor Market Trends	48
1.4 Mid-IR Detection	49
1.5 Infrared Radiation Variation of Measuring Techniques	52
<b>2 MID IR SENSORS MARKET SHARES AND MARKET FORECASTS</b>	<b>55</b>
2.1 Mid-Infrared (IR) Sensor System Market Driving Forces	55
2.1.1 Benefits of Mid IR Sensors	57
2.1.2 Mid IR Sensor Military Technology Gaining Traction in Commercial Markets	60
2.1.3 Quantum Cascade Laser (QCL)	61
2.1.4 High-Performing Tunable External Cavity Tunable Laser	62
2.1.5 Mid IR Sensor Market Driving Forces	64
2.2 Mid IR Sensor Market Shares	66

## ABOUT THE COMPANY

**WinterGreen Research**, research strategy relates to identifying market trends through reading and interviewing opinion leaders. By using analysis of published materials, interview material, private research, detailed research, social network materials, blogs, and electronic analytics, the market size, shares, and trends are identified. Analysis of the published materials and interviews permits WinterGreen Research senior analysts to learn a lot more about markets. Discovering, tracking, and thinking about market trends is a high priority at WinterGreen Research. As with all research, the value proposition for competitive analysis comes from intellectual input.

**WinterGreen Research**, founded in 1985, provides strategic market assessments in telecommunications, communications equipment, health care, Software, Internet, Energy Generation, Energy Storage, Renewable energy, and advanced computer technology.

Industry reports focus on opportunities that expand existing markets or develop major new markets. The reports access new product and service positioning strategies, new and evolving technologies, and technological impact on products, services, and markets. Innovation that drives markets is explored. Market shares are provided. Leading market participants are profiled, and their marketing strategies, acquisitions, and strategic alliances are discussed. The principals of WinterGreen Research have been involved in analysis and forecasting of international business opportunities in telecommunications and advanced computer technology markets for over 30 years.

The studies provide primary analytical insight about the market participants. By publishing material relevant to the positioning of each company, readers can look at the basis for analysis. By providing descriptions of each major participant in the market, the reader is not dependent on analyst assumptions, the information backing the assumptions is provided, permitting readers to examine the basis for the conclusions.

WinterGreen Research is positioned to help customers facing challenges that define the modern enterprises. The increasingly global nature of science, technology and engineering is a reflection of the implementation of the globally integrated enterprise. Customers trust wintergreen research to work alongside them to ensure the success of the participation in a particular market segment.

WinterGreen Research supports various market segment programs; provides trusted technical services to the marketing departments. It carries out accurate market share and forecast analysis services for a range of commercial and government customers globally. These are all vital market research support solutions requiring trust and integrity.

## About The Principal Authors

**Susan Eustis**, President, co-founder of WinterGreen Research, is a senior analyst. She has done research in communications, healthcare equipment, and computer markets and applications. She holds several patents in microcomputing and parallel processing. She has the original patents in electronic voting machines. She has new patent applications in format varying, multiprocessing, electronic voting, and oxygen management. She is the author of recent studies of the drone and robot marketing strategies, Internet equipment, biometrics, biomaterials, a study of Internet Equipment, Artificial Intelligence, IoT, Worldwide Telecommunications Equipment, Top Ten Telecommunications, Digital Loop Carrier, Web Hosting, Web Services, and Application Integration markets. Ms. Eustis is a graduate of Barnard College. Ms. Eustis was named Top Woman CEO in 2012 by Who's Who Worldwide.
