Wind Turbine Bearings: Technology Evolves To Provide Better Management of Wind Farms

Wind Turbine Bearings: Market Shares, Strategies, and Forecasts, Worldwide, 2018-2024

LEXINGTON, Massachusetts (August 29, 2018) – WinterGreen Research announces that it has published a new study **Wind Bearings: Market Shares, Strategy, and Forecasts, Worldwide, 2018 to 2024**. The 2018 study has 427 pages, 256 tables and figures. The vendors in the wind bearings industry have invested in high-quality technology and processes to develop leading edge wind turbine capability a being implemented in the on shore and offshore sites.

There are a number of different bearing designs that can be found in the gearbox of a wind turbine, but most often, various combinations of CRBs, TRBs and ball bearings are used.

If the bearings are bigger, the bearings last longer, but making the bearings larger increases friction, which decreases turbine efficiency. Current bearings have a replacement cost that is too high. What we need is a quantum leap in bearing technology – bearing materials which are at least ten times tougher than current materials are evolving.

WinterGreen Research, INC.

According to Susan Eustis, leader of the team that prepared the research, “Wind turbine bearings are mission-critical devices. They function inside MW-class turbines, endure dynamic and unpredictable stresses to support movement inside the system. Stress is causing untimely, expensive repairs for many wind turbines. Reliability of mainshaft bearings is an issue. Recent turbine failures have been dramatic, investigation has centered on SRBs: Self-aligning Roller Bearings. Solutions for retrofitting single self-aligning roller bearings (SRBs) in a three-point mount arrangement, including wear-resistant SRBs and a pre-loaded TRB design are in play.”

The global wind turbine bearing market is expected to be \$9.6 billion in 2024 driven by the availability and cost effectiveness of new, stronger, more efficient bearings. Next generation bearings permit wind turbines to produce more power, operate in a less expensive manner, and last longer before bearing replacement. The adoption of widespread use of new bearings makes the turbine devices an optimized choice for renewable energy generation.

WinterGreen Research is an independent research organization funded by the sale of market research studies all over the world and by the implementation of ROI models that are used to calculate the total cost of ownership of equipment, services, and software. The company has 35 distributors worldwide, including Global Information Info Shop, Market Research.com, Research and Markets, electronics.ca, and Thompson Financial. WinterGreen Research is positioned to help customers facing challenges that define the modern enterprises.

The increasingly global nature of science, technology and engineering is a reflection of the implementation of the globally integrated enterprise. Customers trust wintergreen research to work alongside them to ensure the success of the participation in a particular market segment.

WinterGreen Research supports various market segment programs; provides trusted technical services to the marketing departments. It carries out accurate market share and forecast analysis services for a range of commercial and government customers globally. These are all vital market research support solutions requiring trust and integrity.

Key Words: wind turbine bearings. Main bearings, slewing bearings, on-shore turbine bearings, off shore turbine bearings, bearing materials, renewable energy generation, wear resistant bearings,

Wind Turbine Bearings: Market Shares, Strategies, and Forecasts, Worldwide, 2018 to 2024

Report Methodology

This is the 805th report in a series of primary market research reports that provide forecasts in communications, telecommunications, the Internet, computer, software, telephone equipment, health equipment, and energy. Automated process and significant growth potential are priorities in topic selection. The project leaders take direct responsibility for writing and preparing each report. They have significant experience preparing industry studies. Forecasts are based on primary research and proprietary data bases.

The primary research is conducted by talking to customers, distributors and companies. The survey data is not enough to make accurate assessment of market size, so WinterGreen Research looks at the value of shipments and the average price to achieve market assessments. Our track record in achieving accuracy is unsurpassed in the industry. We are known for being able to develop accurate market shares and projections. This is our specialty.

The analyst process is concentrated on getting good market numbers. This process involves looking at the markets from several different perspectives, including vendor shipments. The interview process is an essential

WinterGreen Research, INC.

aspect as well. We do have a lot of granular analysis of the different shipments by vendor in the study and addenda prepared after the study was published if that is appropriate.

Forecasts reflect analysis of the market trends in the segment and related segments. Unit and dollar shipments are analyzed through consideration of dollar volume of each market participant in the segment. Installed base analysis and unit analysis is based on interviews and an information search. Market share analysis includes conversations with key customers of products, industry segment leaders, marketing directors, distributors, leading market participants, opinion leaders, and companies seeking to develop measurable market share.

Over 200 in depth interviews are conducted for each report with a broad range of key participants and industry leaders in the market segment. We establish accurate market forecasts based on economic and market conditions as a base. Use input/output ratios, flow charts, and other economic methods to quantify data. Use in-house analysts who meet stringent quality standards.

Interviewing key industry participants, experts and end-users is a central part of the study. Our research includes access to large proprietary databases. Literature search includes analysis of trade publications, government reports, and corporate literature.

Findings and conclusions of this report are based on information gathered from industry sources, including manufacturers, distributors, partners, opinion leaders, and users. Interview data was combined with information gathered through an extensive review of internet and printed sources such as trade publications, trade associations, company literature, and online databases. The projections contained in this report are checked from top down and bottom up analysis to be sure there is congruence from that perspective.

The base year for analysis and projection is 2017. With reference to data from back to 2010 and for the several years prior to the 2017 baseline, market projections were developed for 2018 through 2024. These projections are based on a combination of a consensus among the opinion leader contacts interviewed combined with understanding of the key market drivers and their impact from a historical and analytical perspective.

The analytical methodologies used to generate the market estimates are based on penetration analyses, similar market analyses, and delta calculations to supplement independent and dependent variable analysis. All analyses are displaying selected descriptions of products and services.

This research includes reference to an ROI model that is part of a series that provides IT systems financial planners access to information that supports analysis of all the numbers that impact management of a product launch or large and complex data center. The methodology used in the models relates to having a

WinterGreen Research, INC.

sophisticated analytical technique for understanding the impact of workload on processor consumption and cost.

WinterGreen Research has looked at the metrics and independent research to develop assumptions that reflect the actual anticipated usage and cost of systems. Comparative analyses reflect the input of these values into models.

The variables and assumptions provided in the market research study and the ROI models are based on extensive experience in providing research to large enterprise organizations and data centers. The ROI models have lists of servers from different manufacturers, Systems z models from IBM, and labor costs by category around the world. This information has been developed from WinterGreen research proprietary data bases constructed as a result of preparing market research studies that address the software, energy, healthcare, telecommunications, and hardware businesses.

Wind Turbine Bearings: Market Shares, Strategies, and Forecasts, Worldwide, 2018-2024

Table of Contents

Wind Turbine Bearings: Executive Summary

The study is designed to give a comprehensive overview of the Wind Turbine Bearings market segment. Research represents a selection from the mountains of data available of the most relevant and cogent market materials, with selections made by the most senior analysts. Commentary on every aspect of the market from independent analysts creates an independent perspective in the evaluation of the market. In this manner the study presents a comprehensive overview of what is going on in this market, assisting managers with designing market strategies likely to succeed.

Wind Bearings Core to Efficient Turbine Operation: Bring Strong Growth for Renewable Energy Projects 3

WIND BEARINGS EXECUTIVE SUMMARY 40

Wind Turbine Bearings Market Forces 41

1. WIND BEARINGS: MARKET DESCRIPTION AND MARKET DYNAMICS 52

1.1 Bearing is Mechanical Device That Reduces Friction Between Moving Parts 52

1.2 Extending Bearing Life in Wind Turbine Mainshafts 54

1.3 Financial Impact of Wind Turbine Rebuild 55

1.3.1 Digitalization 57

1.4 Globalization 58

1.4.1 Electric Vehicles, Connected Vehicles, and Urbanization 58

1.1 Classification of Wind Bearings by Product Category 59

1.2 Product Overview and Scope of Wind Bearings 60

1.3 Classification of Wind Bearings by Product Category 61

2. WIND TURBINE BEARINGS: MARKET SHARES AND FORECASTS 62

2.1 Wind Turbine Bearings Market Driving Forces 62

2.1.1 Local Generation of Wind Energy 63

2.1.2 Global Warming Reaching A Point Where It Is Impossible To Ignore 63

2.2 Wind Bearings Market Shares 65

2.2.1 Wind Roller Bearing Sets for Main Shaft Market Shares, Dollars and Analysis 67

2.2.2 Wind Roller Bearing Sets for Main Shaft Market Shares, Units 68

2.2.3 Wind Roller Bearing Sets for Yaw, Pitch, and Other Market Shares, Analysis and Dollars 69

2.2.4 Wind Roller Bearing Sets for Yaw, Pitch, and Other Market Shares, Units 71

2.2.5 Timken 72

2.2.6 SKF 74

2.2.7 Dalian Metallurgical Bearing Group DYZV 74

2.2.8 ZWZ 74

2.2.9 NSK 75

2.2.10 Defontaine S.A. / Rollix 75

2.2.11 Schaeffler Group 75

2.2.12 Schaeffler Group Rotor Shaft Bearing Support 75

2.2.13 TMB 76

2.2.14 Liebherr 76

2.2.15 NTN 76

2.2.16 IMO 77

2.2.17 Xuzhou Helin Slewing Bearing Company 77

2.2.18 Wind Turbines Market Shares, Dollars, Worldwide, 2016 and 2017 78

2.3 Wind Bearings Market Forecasts 79

2.3.1 Wind Turbine Bearings Unit Analysis 80

2.3.2 Wind Bearing Issues Impacting Market Growth 83

2.4 Wind Bearings Market Segments 89

2.4.1 Wind Bearing Market Segments, Onshore, Offshore 89

2.4.2 Wind Bearing Market Segments, Main Bearings and Slewing Bearings 90

2.4.3 Onshore 91

2.4.4 Offshore Wind Bearings 95

2.4.5 Siemens Offshore 100

2.4.6 North Sea Artificial Power Island Project 100

2.4.7 Massachusetts Offshore Wind Farms 103

2.4.8 Horizontal Axis Wind Bearings 105

2.4.9 Vertical Axis Wind Bearings 105

2 WIND BEARINGS MARKET OVERVIEW 107

2.1 Classification of Wind Bearings by Product Category 107

2.2 Product Overview and Scope of Wind Bearings 108

2.3 Classification of Wind Bearings by Product Category 109

2.3.1 Wind Bearing Market Segments, Onshore, Offshore Dollars, Worldwide, 2017-2024 109

2.3.2 Wind Bearing Market Segments, Main Bearings and Slewing Bearings 110

2.4 Global Wind Bearings Market Competition by Participants 111

2.5 Types of Bearings 118

ABOUT THE COMPANY

WinterGreen Research, research strategy relates to identifying market trends through reading and interviewing opinion leaders. By using analysis of published materials, interview material, private research, detailed research, social network materials, blogs, and electronic analytics, the market size, shares, and trends are identified. Analysis of the published materials and interviews permits WinterGreen Research senior analysts to learn a lot more about markets. Discovering, tracking, and thinking about market trends is a high priority at WinterGreen Research. As with all research, the value proposition for competitive analysis comes from intellectual input.

WinterGreen Research, founded in 1985, provides strategic market assessments in telecommunications, communications equipment, health care, Software, Internet, Energy Generation, Energy Storage, Renewable energy, and advanced computer technology.

Industry reports focus on opportunities that expand existing markets or develop major new markets. The reports access new product and service positioning strategies, new and evolving technologies, and technological impact on products, services, and markets. Innovation that drives markets is explored. Market shares are provided. Leading market participants are profiled, and their marketing strategies, acquisitions, and strategic alliances are discussed. The

WinterGreen Research, INC.

principals of WinterGreen Research have been involved in analysis and forecasting of international business opportunities in telecommunications and advanced computer technology markets for over 30 years.

The studies provide primary analytical insight about the market participants. By publishing material relevant to the positioning of each company, readers can look at the basis for analysis. By providing descriptions of each major participant in the market, the reader is not dependent on analyst assumptions, the information backing the assumptions is provided, permitting readers to examine the basis for the conclusions.

WinterGreen Research is positioned to help customers facing challenges that define the modern enterprises. The increasingly global nature of science, technology and engineering is a reflection of the implementation of the globally integrated enterprise. Customers trust wintergreen research to work alongside them to ensure the success of the participation in a particular market segment.

WinterGreen Research supports various market segment programs; provides trusted technical services to the marketing departments. It carries out accurate market share and forecast analysis services for a range of commercial and government customers globally. These are all vital market research support solutions requiring trust and integrity.

About The Principal Authors

Susan Eustis, President, co-founder of WinterGreen Research, is a senior analyst. She has done research in communications, healthcare equipment, and computer markets and applications. She holds several patents in microcomputing and parallel processing. She has the original patents in electronic voting machines. She has new patent applications in format varying, multiprocessing, electronic voting, and oxygen management. She is the author of recent studies of the drone and robot marketing strategies, Internet equipment, biometrics, biomaterials, a study of Internet Equipment, Artificial Intelligence, IoT, Worldwide Telecommunications Equipment, Top Ten Telecommunications, Digital Loop Carrier, Web Hosting, Web Services, and Application Integration markets. Ms. Eustis is a graduate of Barnard College. Ms. Eustis was named Top Woman CEO in 2012 by Who's Who Worldwide. She was named Top Woman Market Research Analyst in 2012, 2013, 2014, 2015, 2016, and 2017. She has been twice featured on the cover of the Women of Distinction magazine. She was cited in a recent Time Magazine article and major media articles on Youth Sports market growth. She was also featured in recent Wall Street Journal, New York Times, HBO, and London Times articles.

WinterGreen Research, INC.

About the WinterGreen Research Team: The WinterGreen Research Team is comprised of senior analysts that prepare the market research and analysis that is offered to the client and developed using an iterative process to achieve a final study. Typical projects include providing market/viability research. The team can look at how drones can be applied to critical infrastructures safety, including: type of market existing, Barriers, Forecast demand and competitors, SWOT and competitive advantages, Price Analysis, product design recommendations (marketing orientation).

Research is typically for many different regions or localities, for example EU countries including Spain, UK, Nordic, Germany, and France. Typical projects profile the United States and areas of Asia. It is common to three representative countries from South America, Brazil, Argentina, Chile, and Mexico. Representative countries from Asia APAC typically include Japan, China, India, and Australia.

Critical infrastructure safety, including: type of market existing, barriers to entry and to faithful execution of product provision, forecast of demand, market share, SWOT, competitive advantage of major competitors, identification of new technologies and new companies, price performance analysis, product design recommendations, and marketing considerations are typical topics covered.
